Rose-Hulman Institute of Technology’s Mechanical Engineering Department, a recognized leader in undergraduate engineering education, invites applications for tenure-track positions beginning fall 2016. We are particularly seeking assistant professors with interests in teaching machine design, manufacturing, introductory (undergraduate) materials engineering, or design. However, exceptional applicants in any area and at all levels will be considered. Applicants must have a strong commitment to undergraduate engineering education, including a passion for classroom teaching and laboratory instruction and a commitment to life-long personal and professional development. An earned Ph.D. or near completion is required. A B.S. degree in mechanical engineering and industrial experience are desirable. Essential job functions include: classroom teaching and student advising; curriculum development and improvement; and service and committee work. For full consideration please apply on-line at: https://jobs.rose-hulman.edu. Additional information is available at: http://www.rose-hulman.edu/me/. Screening will begin November 30, 2015. EEO/AA
